

TARGETS — the lines

▲ = look LONG at this level ▼ = look SHORT at it

ARROW = THE TRADE, never the location. a break flips level AND arrow.
thickness = touches survived (1-3) · pivots + PDH/PDL + ONH/ONL · hover = info

THE PLAYS — one per outcome

✓ BOUNCE

support held = ENTER UP · resistance held = ENTER DOWN
entry: retest of the level after the chip bar
stop: one tolerance beyond the level
target: opposite race distance (room check first)

◆ TRAP — strongest signal

same direction as the bounce would be
entry: same retest — stop goes BEHIND the sweep wick
tighter risk: the stop run beyond the level is done
trapped traders unwinding = fuel toward your target

✗ FLIP RETEST

never chase the break bar
wait: price returns to the flipped level
green chip prints on the NEW side = enter WITH the break
no retest hold = no trade

CHIPS — what just happened

✓ +1

HIT — touch held, closed back on origin side.
level survives, gains strength

✓ +1 ★

str-3 target held
best level on the board

◆ +2

TRAP — wick swept through, close reclaimed (2B).
chip marks the exact sweep extreme

✗

BREAK — close accepted through. scar dies dotted.
target FLIPS sides · FLIP tag 20 bars · spawns stronger

chips are permanent — they ARE the session log on the chart

NEXT RACE — right-edge callouts

▶ ▼ 657t

leader — closer level, first magnet

▲ 978t

trailing — farther level

arrow = the trade WAITING there, not direction of travel.
ROOM CHECK: bounce only if the opposite race covers your stop.

VERDICT STRIP — it reads itself

● CHOP 52% · HALF SIZE

▼ PAYING ▲ MIXED RUN 3 ◆ 2

● BOUNCE DAY — levels holding. hunt the bounces + traps.

● TREND DAY — levels failing. only FLIP retests.

● CHOP = coin flip, half size · WARMING UP = under 3 tests

▼ form = are SHORTS at ceilings paying (last 5 tests)

▲ form = are LONGS at floors paying (last 5 tests)

RUN = consecutive holds (any break resets) · traps counted daily
strip resets at 09:30 open · first red print after a long RUN = kickoff

HOUSE RULES

BAR CLOSE DECIDES

chips print on confirmed close only. no repaint.
never act on the wick mid-bar.

RE-ARM

a scored target is dead until price leaves the arm zone.
second tag with no chip = not a signal.

SHOT CARD

E white dash = retest limit · S red = past the level · T green
= next opposing level. PAID / STOP stamps · W-L in the strip.

CHOP GUARD

fresh flip needs double-width close · 2 parked closes = break.

LINE CHART

wicks invisible but engine sees them — candles on trap prints.

ALERTS

"Any alert() function call" · SHOT alert carries E/S/T/R.

THE 5-SECOND READ

1 line white?
shot is live

2 chip color?
held · trap · broke

3 day call?
bounce · chop · trend

4 who leads race?
first magnet + room

5 RUN streak?
regime confidence
